 **AMP** POWER PROTECTION

Founded February 2020

Four of the senior management of Harland Simon UPS have joined forces with Amp Procurement (“AMP”) to form Amp Power Protection Limited (“APPL”)

APPL will provide rugged Power Protection Solutions to customers working in industrial applications, this will include:- custom design, supply, testing, project management, independent testing, documentation, service and support of: Uninterruptible Power Supply (UPS) Systems and Commercial Off The Shelf (“COTS”) UPS products

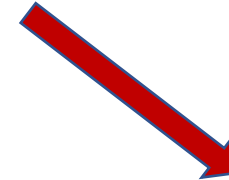

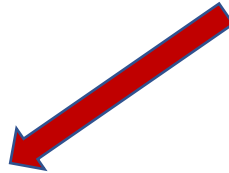

Amp Procurement Limited (“AMP”) provides supply chain management services to a range of customers, but principally operates within the defence sector.

AMP Power Protection can provide the  
solution to your power problem

# **AMP** POWER PROTECTION

## Product TYPE

- Standard

- Rugged

- Custom

# **AMP** POWER PROTECTION

## Products

- Power Protection – Protected Power
- Uninterruptible Power Supplies
- Inverters – DC to AC, Frequency
- Convertors – AC to DC or DC to DC
- Batteries – Lead Acid – Lion – Nicd
- Standard – Rugged – Custom
- Environmental protection – Ingress – EMC – Environment
- Harsh Industrial applications – Defence – Transport – Utilities
- Turnkey complete solution

# **AMP** POWER PROTECTION

## Capabilities

- In House Design & Development – 3D Inventor modelling & simulation
- In House Manufacture and System Integration – ISO9001 Factory
- Modifications / Ruggedisation / Customisation. Standard-Rugged-custom
- Full In house & Independent External Type Testing
- Project Management – Prince2 process using Microsoft Project
- As built 2D-3D CAD drawings / schematics
- Full Project documentation – SOW - VCRI
- Factory Testing Facilities
- Site Installation
- Full After Sales Support – ILS/CLS - Extended Warranties / Maintenance Contracts

## Product Modifications

- Ruggedisation
- Environmental protection up to IP66
- Bespoke enclosures (Form/Fit/Function of existing product)
- Connectors as required
- Electrical protection & distribution
- Software and firmware interfacing
- Thermal control, heater mats, fans
- Labelling, earthing
- User Display and Control
- Peripheral options
