

AMP Power Protection Ltd Environmental Performance Statement Q1-2025

AMP Power Protection Ltd are committed to the prevention of pollution and continual improvement of our environmental performance. This has been facilitated through setting environmental objectives based on our environmental aspects. To achieve this goal, we have focussed on environmental issues, changed our working practices and processes to allow us to reduce our carbon footprint by setting clear goals, objectives, and putting measures in place that will allow us to reduce our impact on our environment.

AMP Power Protection Ltd have undertaken the following in Q1 2025:

- Continuous review of our Environmental Management System ISO1400:2015
- Implement systems and procedures that ensure delivery of our environmental compliance obligations
- Setting targets for the organisation at least in line with Central Government Greening Government Commitments, including the target to be Net Zero by 2050 or earlier.
- Provide employee training to enhance environmental awareness of our employees.
- Lead by example in promoting environmental sustainability.
- Adopting hybrid working for all staff, reducing days in the office from 5 days to 3 days per working week.
- Working in partnership with our transport companies by conserving energy, consolidating our deliveries and effectively reducing our fuel consumption.
- To further reduce our waste, we have now installed recycling facilities in our offices and units.
- We have reevaluated our waste policy and procedures to ensure they are more robust and to reinforce our environmental focus and expectation from our workforce.
- We have reevaluated our housekeeping policy and procedures to raise awareness amongst our workforce.

We continue to work in partnership with local businesses, neighbours, partners, and our suppliers to encourage commitment and improvement in our local environment.

The AMP Power Protection facility is based at Bucks-Biz iCentre in Newport Pagnell

Bucks Biz have implemented the below facilities on site to help reduce our carbon footprint and minimise our impact on the environment.

- The installation of energy efficient sensor lighting in all communal areas, that automatically turn off when not in use.
- LED lighting installed throughout the building.
- Provided new recycling facilities to reduce our waste.
- Installation of solar panels across the length of the building roof.

AMP Power Protection Limited | iCentre | Howard Way | Newport Pagnell | MK16 9PY
